

# Working Within The Zodiac

Use the energy of the zodiac  
enhance your magickal efforts.

When you sit down to write down your new years resolution, or you're meditating on a long term or life goal of yours for ideas on how to move yourself closer to achieving that goal, take a moment to think about what your intent with each item is. Then try to plan out efforts during specific zodiac phases through the year to help boost your efforts and increase your chances of success.

It is not necessary to wait for a specific zodiac phase to work certain rituals or spells. This is more about knowing what magickal boosters are available to help enhance your workings and how exactly to use those magickal boosters.

Each Zodiac is aligned with a constellation found in the night sky through the year. The energy of a constellation is most potent during its season - or during that Zodiac Phase of the year. While its true that all zodiac energies are available at any point in time, working with the natural universe has its rhythms.

## *The Zodiac and the magickal energies each sign gives you to work with.*

Aries - March 21 - April 19: start new projects, spells concerning leadership, to bring assertiveness to the timid or to energize the listless.
